

## KICA and the Kiawah Island Garden Club Special Event: Monarchs and Milkweed

Please join the us and other members of our community for a presentation on the future of our island's Monarch Butterfly habitat.

Monarch butterflies are on the decline. What can Kiawah Island do as a community to help them survive? Billy McCord, biologist with the Department of Natural Resources and a leading expert on monarchs and milkweed, has a few surprising ideas on the subject. Please join us at 3 p.m. on Wednesday, September 29 at the Sandcastle for a thought-provoking presentation. If we are lucky, we will also get to watch him tag and release some monarchs.

RSVP to [gaye.stathis@kica.us](mailto:gaye.stathis@kica.us) by September 17.
